**THE HOUSE BEAUTIFUL—THE HOUSE SANITARY!**

A new and better kind of lining. Tiling is the ideal wall covering. In the modern bathroom and kitchen the wall covering must be clean, durable and waterproof. The beauty of the wall covering is also important, but it should be simple beauty. The ideal wall covering for kitchens, bathrooms—or any other place where absolute cleanliness and sanitation is essential—is therefore, tiling. Because tiling is not only beautiful in its simplicity, but also by far the most sanitary of all wall coverings, as well as the easiest to clean and keep clean. The Two Different Kinds of Tiling—There are two distinct kinds of tiling worth considering—Porcelain or Ceramic Tiling, and No-Co-Do Steel Tiling.

**No-Co-Do Tiling**

In the new and better kind of mosaic tiling, it is better than any other kind of mosaic tiling because it looks more like the real thing. It also wears better and lasts longer, and, most important of all, it is by far the most inexpensive substitute for real tiling. No-Co-Do Tiling looks exactly like the real thing, because the "mosaic" effect is produced by wearing in the lines and stamping them deep and clear. And No-Co-Do Tiling costs but one-fifth as much as real tiling. No-Co-Do Tiling is not only the most economical substitute for real tiling in point of first cost, but it is also the most economical in the end, because it will last as long as the building stands, and it will never need any repainting, except an occasional new coat of enamel.
